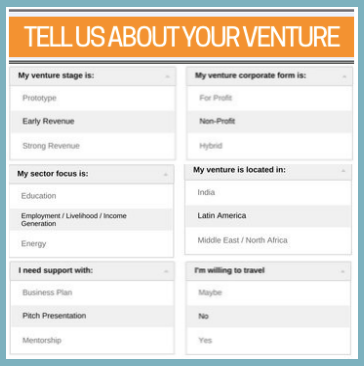
ACCELERATOR SELECTION TOOL

Developed in partnership with leading databases and impact accelerator networks with the most comprehensive program information in the world, the Accelerator Selection Tool maps the global impact accelerator landscape, helping social entrepreneurs easily find information that best fits the needs of their ventures, while providing data about social entrepreneurs and market trends to accelerators and investors.



THE TOOL

Database Partners aggregate nine simple pieces of public information, Network Partners use the information to support their research and entrepreneurship efforts, and Distribution Partners provide the tool as a free resource to their community — each contributing a piece of the puzzle to create the most comprehensive view of accelerators to date.

THE IMPACT

Social Entrepreneurs spend less time finding the right program at the right time.

Accelerators gain insight on global trends, new market opportunities, and visibility to well matched entrepreneurs.

Investors gain insight into pipeline partners for investible deals.

Did You Know?

It takes an entrepreneur an average of 20 to 100 hours to determine which accelerator programs to apply to. The Accelerator Selection Tool simplifies that process and increases the probability for success.
